# Aarhus City Hall, Denmark

## **DCS 6000**

### **Digital Conference System**

Aarhus City Hall was designed by the famous Danish architect Arne Jacobsen in 1941. It forms both the setting for the city administration and furthermore outstanding architectural values. The city hall is a main example of the Nordic version of functionalism with roots to the international functionalism at that time. Because of these values the city hall was protected as a national memory in 1995.

The installation of the DIS conference system was subject to this protection as it was not allowed to make any changes to e.g. the furniture.

The DCS-LAN with standard CAT 5 cables from the central unit to the microphones is installed under the tables. Connection of the portable DM 6070 microphones to the LAN is possible by removing the old, brass ashtrays and plug in the microphones.

The portable DM 6070 microphone includes loudspeaker, channel selectors and a gooseneck microphone. The system can be at any time expanded with the interpretation feature.
